Éric NICOLAS
Solutions Architect

Top Skills

AWS Platform ◇ Arch. Design
Git Surgery ◇ Linux Sys. Admin.
DevOps ◇ TypeScript ◇ Java
Documentation ◇ DB Admin.
Web Dev. ◇ Communication
Code Quality ◇ Organisation

Education

Engineer's Degree
in **Network Security**

Upskilled in the Java language by Rémi FORAX ↗, major contributor to its expansion.
Awarded with the greatest distinction. Graduated top of class.

Licentiate Degree
in **Computer Science**

Awarded with the greatest distinction. Graduated top of class.

Baccalaureate
in **Applied Physics for Electronics**

Awarded with the greatest distinction. Graduated top of class; top 0.4% nationwide.

Endorsements

Christian POPESCU ↗
Senior Software Engineer

Éric showed obvious technical skills and remarkable abstraction capacities.
I trust in his technical and human skills.

Étienne DURIS ↗
University Professor

Éric is a hard-working person, tackling all assignments with dedication.
I highly recommend him, he is a team player and would make a great asset to any organization.

About Me

I am a strategic, detail-oriented problem solver with a keen and analytical mind, driven by a passion for innovation. My experience has taught me that a project's value lies in accurately identifying and contextualising the objectives to achieve—this is where I make the greatest impact.

In designing systems, I believe that clarity ↗ and elegance ↗ are key to lasting relevance: I am a stalwart advocate of radical simplicity and empower my collaborators to strive for creative solutions that will remain effective and adaptable.

Experience

Principal Software Engineer at Unite ↗ (remote position)
Nov. 2022 – Present (3 years)   Leipzig, Germany

Enabling our feature teams ↗ to focus on delivering functionality in the trying context of reinventing a B2B e-procurement platform ↗ grossing 500 million euros a year.

Mentored a junior IT developer ↗ in 2023 and 2024.

Solutions Architect at NCLS Development ↗ (independent consultant)
Dec. 2014 – Present (10 years, 11 months)   Brittany region, France

Designed the entirety of the services that make up an enterprise EHS solution trusted by the French national employment agency ↗ since 2016.

Software Engineer at Propellerhead ↗
Dec. 2013 – Dec. 2014 (1 year, 1 month)   Auckland, New Zealand

Co-designed and implemented the engine responsible for parsing and semantically classifying 160+ years of heterogeneous historical data.

Project highlighted by the W3C ↗ as one of the foremost examples for their Data on the Web Best Practices ↗ publication released in 2017.

Product Owner at Gaspard Monge Institute ↗
Sep. 2012 – Mar. 2013 (7 months)   Paris area, France

Led a team of 5 junior IT engineers implementing a proof-of-concept solution for a research project of the institute.

Software Engineer at Safran Aircraft Engines ↗
Sep. 2010 – Sep. 2013 (3 years, 1 month)   Île-de-France, France

Interfaced with physicists to implement real-time ports of cutting-edge signal processing algorithms in the demanding context of aircraft and rocket engines.

Mentored a junior IT engineer ↗ from 2011 to 2013.

Apprentice Product Owner at Site Alpha, Planon group ↗
Sep. 2008 – Sep. 2010 (2 years, 1 month)   Paris area, France

Handpicked by our CEO ↗ to elaborate with him specification documents for the company's new flagship product.

2024

Inaugurate my tech blog
First principal engineer role
Migrate to Neovim

Steered project back on track to meet crucial deadline

I led the initiative to revise the design of a project gone off-course and coordinated the efforts to deliver on time a future-proof solution that would address the imminent amendments to the Visa compliance mandate.

Begin using Rust
for personal projects

Switch to Arch Linux

Migrate Cloud resources
to ARM architecture

corrected course of project
of **6 months'** lead time

with under **3 weeks**
before pivotal cutoff date

2023

Spearheaded redesign of dysfunctional payment workflow

Mastery of Git

Excellent AWS proficiency

Join Unite

I drove the complete overhaul of the procedure and architecture of the credit card payment system at a major B2B e-procurement platform, and provided a working implementation that purged accidental complexity and addressed discovered vulnerabilities.

reduced code base
by about **96%**

for a platform handling annually
billions of euros in transactions

Mastery of RxJs

2020

Resolved performance bottleneck in data computation engine

I proposed to better leverage a customer's database engine and pair intricate SQL queries with savvy and straightforward API design to break the impasse of a solution having far outgrown its original scope.

Mastery of TypeScript

Mastery of D3.js

Migrate services to IPv6

Begin contributing to the TC39

from about 15 seconds
down to **80 milliseconds**

entirely eliminated
the **reliance on caching**

2016

Awarded public tender through innovation partnership

Mastery of AngularJS

Begin independent consultancy

I designed a bespoke EHS solution lauded by a digital incubator of the French government and was funded for its implementation and continuous development.

used by over **9,000**
government employees

ongoing partnership
of nearly **9 years**

Graduation of my apprentice

Excellent JavaScript proficiency

2014

Built data contextualisation protocol for the Semantic Web

Switch to Ubuntu

Join Propellerhead

I jointly designed as well as implemented the procedure and supporting system by which Auckland Museum's collections curator could map out the semantic attributes of their Linked Open Data platform's ever-growing digital archive.

Excellent Java proficiency

First lead developer role

implemented for the **Web 3.0**
over a decade ago

highlighted
by **the W3C**

2012

Identified and addressed costly, recurring resource waste

First mentor role

I noticed an opportunity for, designed, built and drove the promotion of a workflow optimisation for technicians at a world-leading aircraft engines manufacturer to substantially reduce the strenuous cost of late-stage testing of our propulsion systems.

Skilled C++ proficiency
Join Safran Aircraft Engines

Begin using Debian

over **1,000,000 euros**
saved each year

improved longstanding procedure
in the **defence industry**
